

PART 1: Operating System Hardening

i. Secure Password with GPO

ii. Install & Configure Antivirus

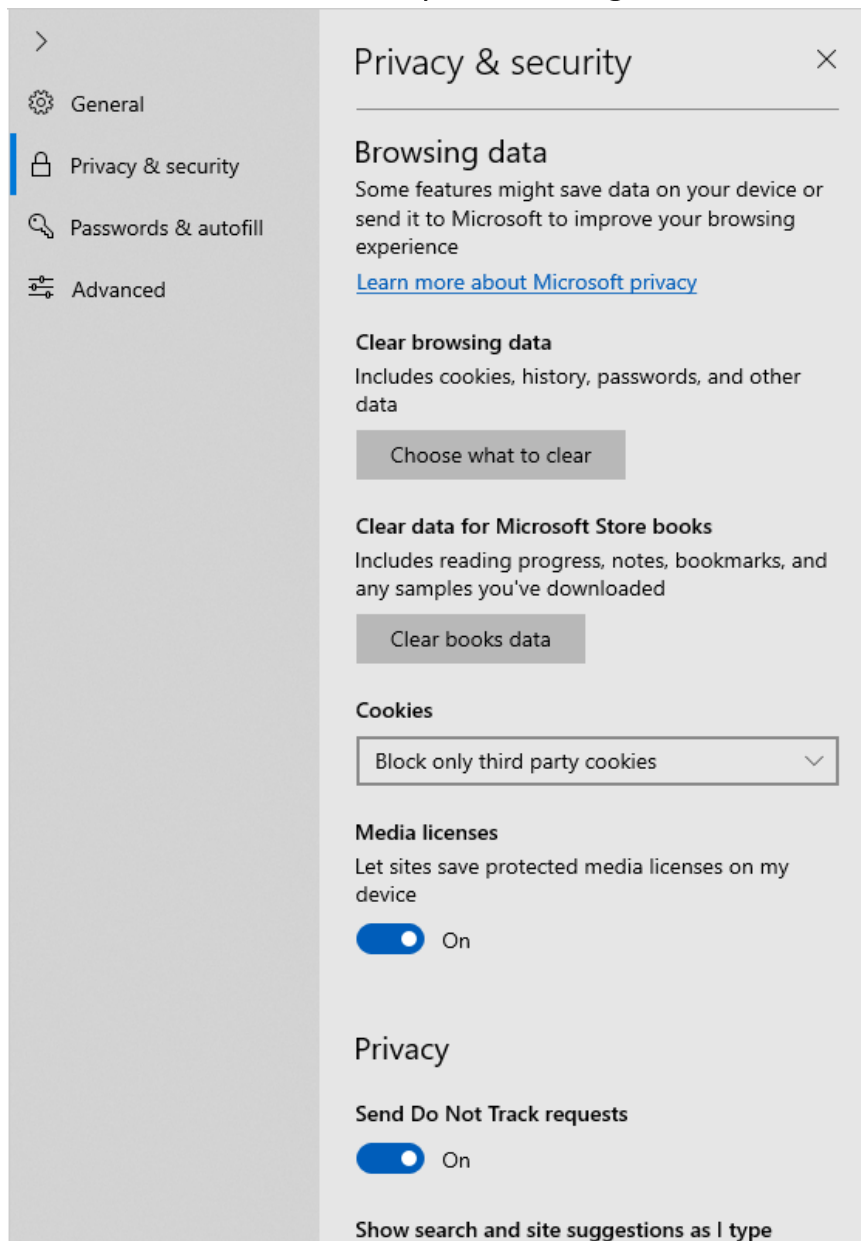

The screenshot displays the Windows Security application window, specifically the 'Virus & threat protection' section. The left sidebar shows navigation options: Home, Virus & threat protection (selected), Account protection, Firewall & network protection, App & browser control, Device security, Device performance & health, and Family options. The main content area shows the 'Virus & threat protection' status, indicating a 'Quick scan running...' with an estimated time remaining of 00:00:18 and 20250 files scanned. A 'Cancel' button is visible. Below this, the 'Virus & threat protection settings' section shows 'No action needed.' and a 'Manage settings' link. The 'Virus & threat protection updates' section shows 'Security intelligence is up to date.' and 'Last update: Not available'. On the right, there are links for 'Windows Community videos', 'Learn more about Virus & threat protection', 'Have a question? Get help', 'Who's protecting me? Manage providers', 'Help improve Windows Security Give us feedback', and 'Change your privacy settings'.

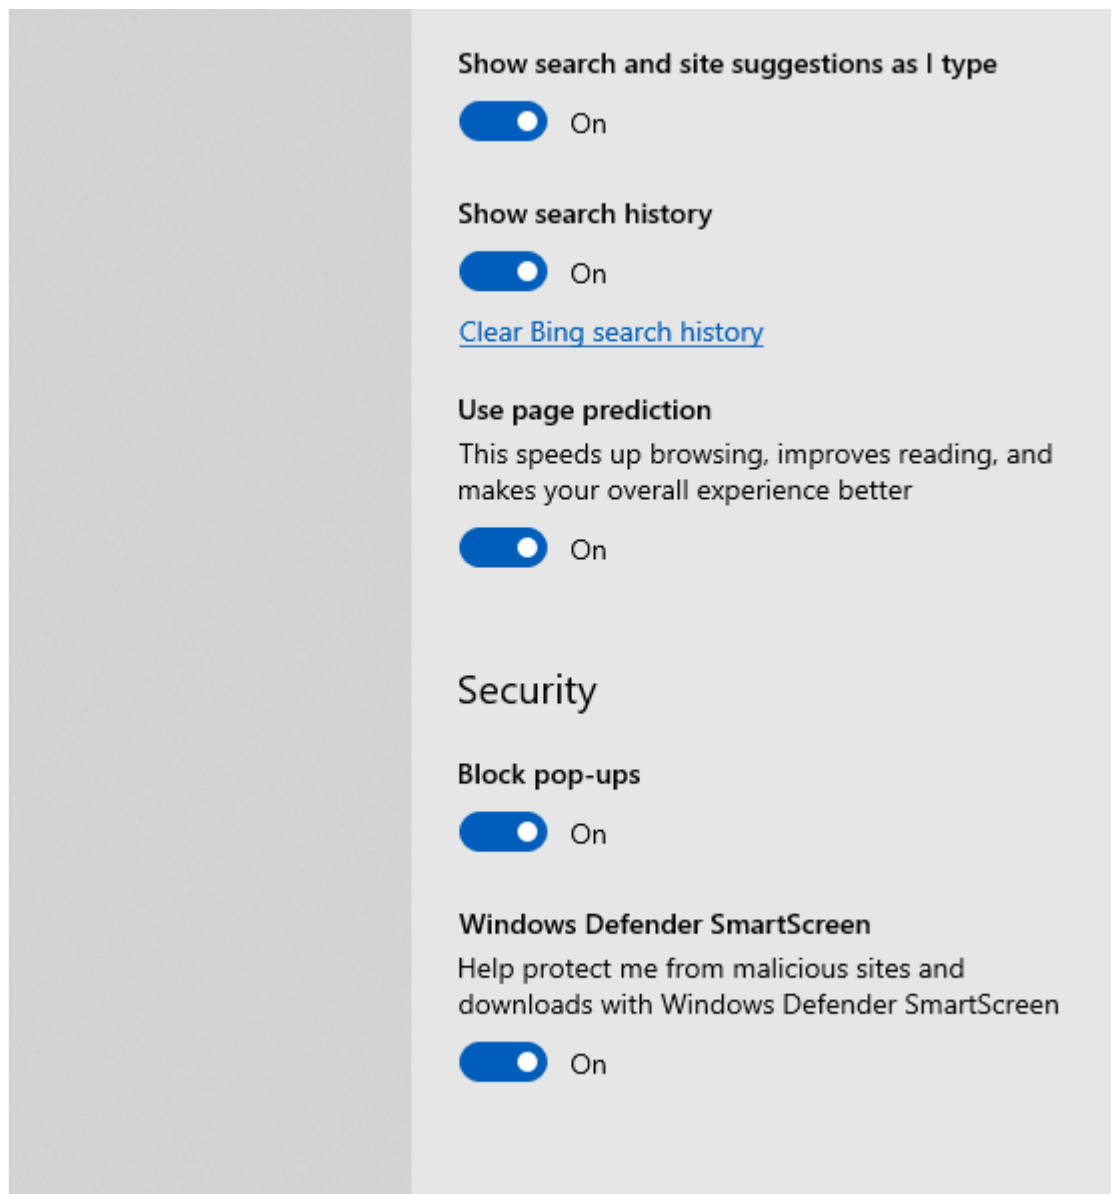

Below the Windows Security window, a task scheduler window titled 'Demo Triage Properties (Local Computer)' is open, showing the 'Triggers' tab. The 'Triggers' tab displays a table with the following data:

Trigger	Details	Status
Daily	At 12:00 PM every day	Disabled

The 'Triggers' tab also includes buttons for 'New...', 'Edit...', and 'Delete'. The 'OK' and 'Cancel' buttons are at the bottom of the window.

PART 2: Browser Security Hardening

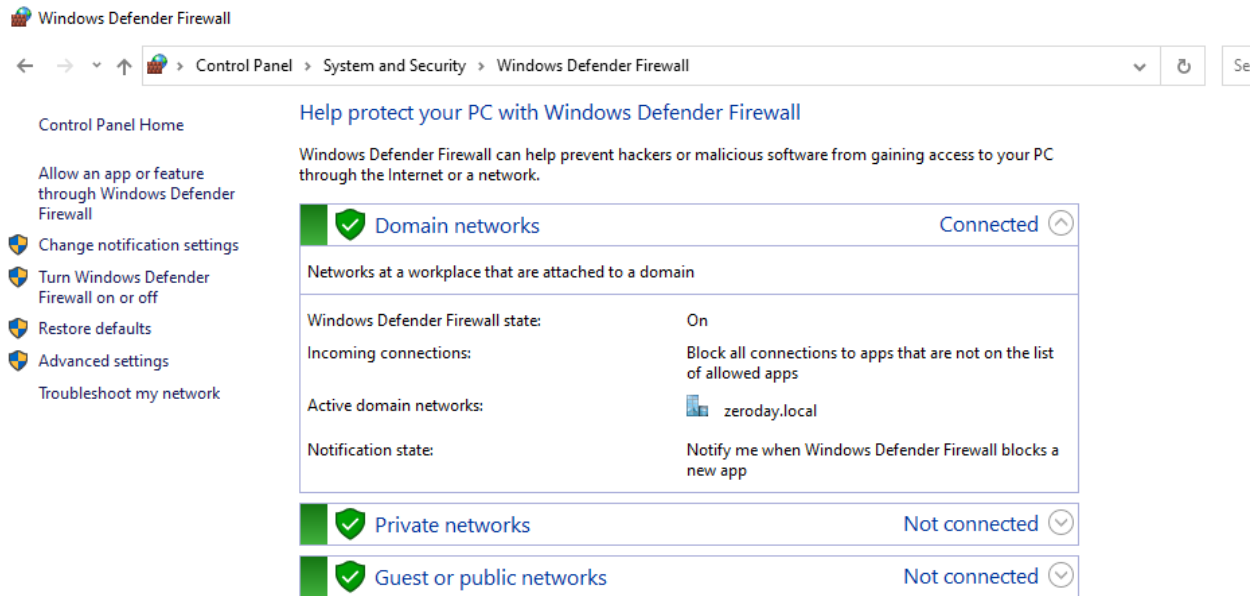

PART 3: Reflection #1

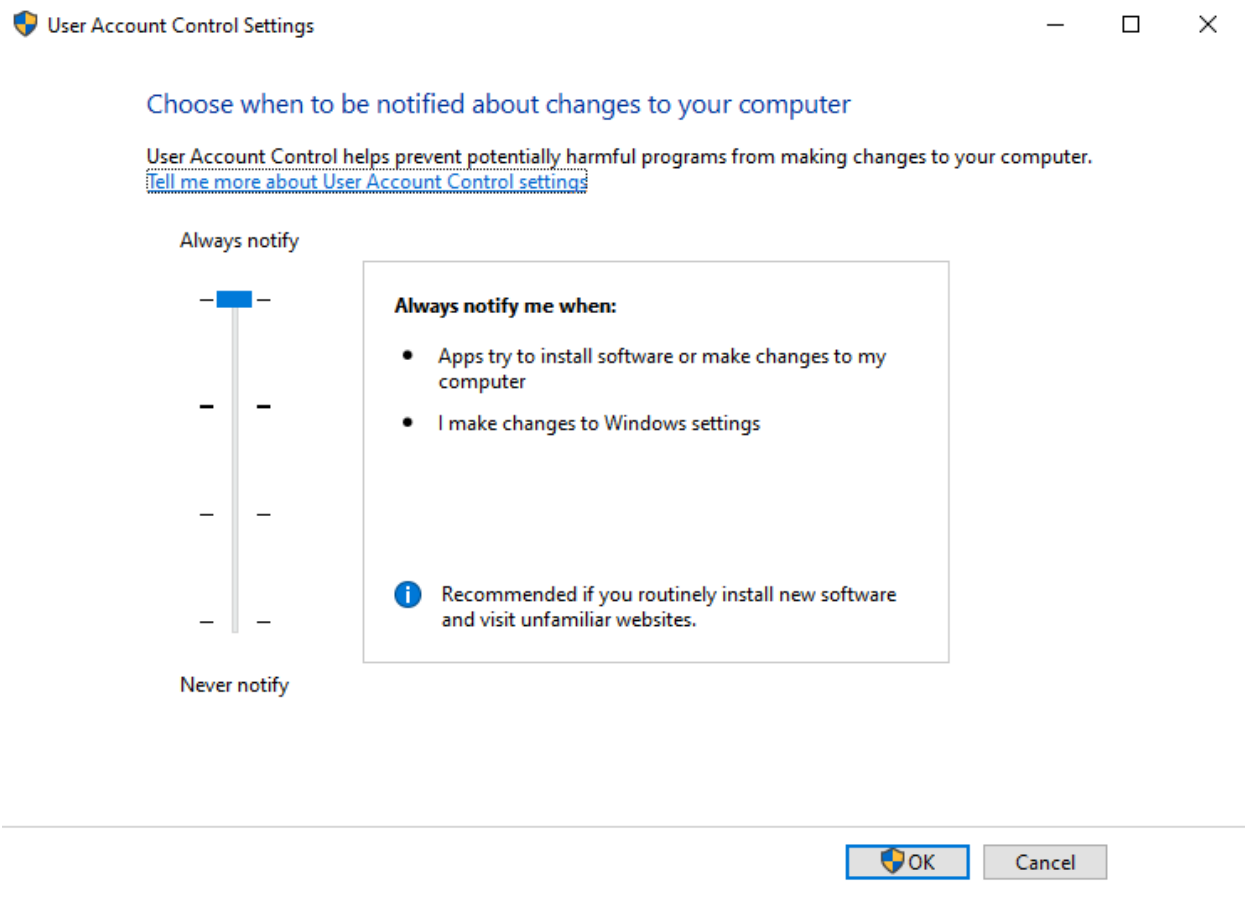

A. Identify 4 Additional Hardening Items

1. Enable Windows Firewall
2. Disable unused services and ports
3. Apply system and software updates
4. Disable autorun for USB devices

Enable Windows Firewall

Restrict User Account Control (UAC) Settings

Configure Account Lockout Policy

- Security Settings - Account Policies - Password Policy - Account Lockout Policy - Local Policies - Windows Defender Firewall with Adv...	Policy - Account lockout duration - Account lockout threshold - Reset account lockout counter after	Security Setting 30 minutes 3 invalid logon attempts 30 minutes
---	--	--

Disable autorun for USB devices
